

PCAB ACCREDITATION

COMPOUNDING PHARMACY

PHARMACY
COMPOUNDING
ACCREDITATION
BOARD

PCAB Accreditation is a service of ACHC International that assesses the non-sterile and sterile pharmacy compounding processes as defined by a specific set of standards that concentrate on the quality and consistency of medications produced. By achieving PCAB Accreditation, compounding pharmacies are able to demonstrate their commitment to compounding the highest-quality medications.

PCAB ACCREDITATION OFFERS:

Non-sterile and sterile accreditation programs compliant with USP <795> and <797>

A consultative approach designed to help pharmacies improve based on survey findings

A three-year accreditation cycle consisting of an on-site survey in addition to an annual verification of compliance

Local representative to help assist throughout the accreditation process

ADDITIONAL BENEFITS:

MARKET ADVANTAGE

- PCAB Accreditation allows pharmacies to distinguish themselves among their competitors by showing a commitment to compliance with USP compounding standards as well as industry best practices.

OPERATIONAL EFFICIENCIES

- PCAB's educational approach to accreditation enhances business operations, helps inform effective strategies, and improves patient outcomes through evidence-based best practices.

RISK AVERSION

- Adherence to PCAB standards helps pharmacies maintain compliance with all applicable rules and regulations.

IMPROVED QUALITY AND SAFETY

- Pharmacies benefit from consistent practices that result in improved safety, efficiency, and quality of care.

CONTINUITY OF SERVICE

- PCAB facilitates a standardised level of service that includes sound procedures, documentation, and training.

DISTINCTION IN HAZARDOUS DRUG HANDLING

- An optional recognition for organisations demonstrating a commitment to meet criteria set forth in USP Chapter <800> Hazardous Drugs - Handling in Healthcare Settings.
